Assessment 2
Java RMI Group Chat Application

Worth: 15% of overall grade
Deadline: 1st May

The overall goal of this assessment is to develop a group chat application using java RMI to implement the remote communication. The specification is very light and you can make the majority of the design decisions by yourself. The only things that are required are as follows:

1. You must use Java RMI
2. You must have a Client GUI (server GUI is optional)
3. Your application must support a group chat with multiple clients.

Deliverables:
• Design documentation
• Demonstration of application (be prepared to answer questions)
